

Aicorn — UI Design Prompt (Skillry-style)

NOTE (first line): Ye prompt sirf **reference aur inspiration ke liye** hai. App ka UI **attached reference image jaisa** dikhna chahiye — wahi theme, wahi style, wahi feel. Brand, naam, colors aur content Aicorn ke apne honge.

MASTER PROMPT (copy-paste)

Build **Aicorn** — a prompt gallery web app where users browse **image prompts, video prompts, and skills**, pick their niche/category, preview the result, and copy the prompt. Design the entire UI in the warm, playful, premium visual style of the attached reference image (cream + lime "tasteful AI tools" aesthetic).

DESIGN TOKENS (reference image se lo)

- Background: warm cream `#F7F4EE` (page), white `#FFFFFF` (cards), near-black `#101010` (dark panels, announcement bar, primary buttons), ink text `#1A1A1A`, muted secondary text `#8A867D`
- Accent: electric lime `#D8F651` — pills, badges, one CTA, highlights. One warm orange-red accent for logo mark + headline drop-shadows.
- Typography: rounded geometric sans-serif (Nunito / Quicksand / Baloo 2 style). Headings extra-bold, tight tracking, large display sizes. Body same family.
- Shape language: fully rounded pill buttons/badges, `rounded-2x1` cards, generous whitespace, soft diffused shadows.
- Signature treatments: lime underline "swash" on a headline keyword; one hero word with orange-red offset drop shadow; hand-drawn red scribble strikethrough on one pricing headline word.

GLOBAL CHROME (reference jaisa)

- Black announcement bar on top (lime pill label + lime pill CTA + dismiss X).
- Sticky frosted-glass cream header: logo left, nav center (Prompts, Skills, Categories, Pricing), center pill search ("What do you want to create?"), icon buttons + black pill "Sign In" right.
- Footer: brand block + 4 link columns + bottom copyright bar.

APP STRUCTURE — AICORN

1. **HOMEPAGE HERO** — Centered. Lime pill eyebrow ("AI PROMPT GALLERY"). Huge bold headline about prompts (e.g. "Copy the prompt. Skip the guesswork."). Subcopy. Two CTAs: black pill "Browse Prompts" + white outline pill "Explore Skills". Below: "WORKS WITH" +

overlapping circular AI-logo avatars. Behind: TWO angled marquee rows of pastel rounded-square tiles with hand-drawn icons (reference image wali feel), scrolling in opposite directions, infinite loop.

2. **PROMPT CATALOG** (/prompts) — Sticky left filter sidebar:

- By type: Image prompts / Video prompts
- By niche: UGC ads, Fashion, Food, Real estate, Fitness, Beauty, Travel...
- By use case / by style Each filter checkbox with count. Main area: "N Prompts" heading, sort dropdown, centered search + "popular right now" chips, 3-column card grid. **Prompt card**: preview image on top, category pill + Free/Pro pill, bold title, author row, prominent **"Copy Prompt"** button, copy-count. Hover: lift + shadow.

3. **PROMPT DETAIL** (/prompts/:id) — Breadcrumb + back. Two columns: left = large preview gallery (image/video thumbnail with play button); right = sticky card (title, category + type pills, rating, full prompt text in a code-style box with big black **"Copy Prompt"** button, lime Pro upsell banner, "Download" outline button). Below: niche tag chips, "how to use" steps, "Similar prompts" carousel, FAQ accordion.

4. **SKILLS SECTION** (/skills) — Same catalog layout as prompts but for Skills (reusable instruction packs): filter sidebar (by output: Slides, Web, Images, Video), card grid with install counts, detail page with "Copy install prompt" + "Download ZIP" buttons.

5. **CATEGORIES / NICHE PAGE** — Visual niche picker: grid of big pastel tiles (one per niche — UGC, Fashion, Food, Fitness...), clicking a tile opens that niche's prompt feed (image + video prompts mixed, filterable).

6. **PRICING** — Centered headline with red scribble strikethrough on one word. 3 cards: Free / Pro (lime "MOST POPULAR" badge, lime CTA) / Lifetime. Feature checklists, FAQ accordion.

7. **GUIDE / BLOG** — Narrow editorial column, dark "fastest way" card with command + Copy, numbered steps with lime checks, inline code chips.

MOTION SPEC (reference jaissa, calm)

- Marquee tiles: infinite scroll, opposite directions, ~30s/loop, pause on hover.
- Carousels: snap-scroll + arrows, smooth easing.
- Buttons: hover scale 1.02 + shadow. Cards: hover lift.
- Accordions: smooth expand, icon rotate.
- Load: hero lines stagger fade/slide-up. Scroll: fade-up reveals.
- No typewriter, no parallax — calm and playful.

RESPONSIVE — Desktop-first 1440px; grid 3 → 2 → 1; sidebar → slide-over; hero type with clamp().

Build: landing, prompts catalog, prompt detail, skills, niche page, pricing, guide/blog — sab same header/footer ke saath. Saath mein attached reference image khula rakhna aur har section ki styling usse match karna.

ANALYSIS NOTES (2026-09-29)

- Reference: skillry.dev (AI agent skills marketplace) — 6 pages captured in `skillry-ui-all-pages.png` (same folder): home, skills catalog, skill detail, install guide, pricing, blog.
- Aicorn rebuild plan: prompt gallery — image prompts + video prompts + skills, niche/category-wise browsing, copy-prompt core action.
- Design tokens (cream/lime) aur motion spec reference image se liye gaye; content aur brand Aicorn ka apna.
